

SPC FLOORING

Description:

SPC (Stone Plastic Composite) flooring is an excellent choice for modern buildings due to its eco-friendly, lightweight design. Our product is highly durable, resistant to wear, scratches, stains, and pressure, while offering comfort through high elasticity. Safety features include anti-skid properties, along with B1 fire retardant and sound-absorbing capabilities. Additionally, it has good thermal conductivity for efficient heat dissipation and allows for easy installation, saving time and labor costs.

PRODUCT DETAIL

SPC flooring is a composite made of 100% virgin PVC and calcium powder, processed through high-temperature extrusion. It possesses excellent waterproof, moisture-proof, mildew-proof, and corrosion-proof properties. Additionally, SPC flooring features high wear resistance, pressure resistance, scratch resistance, and chemical resistance, making it suitable for use in homes, businesses, offices, and other environments.

The appearance of SPC flooring offers a wide range of textures and colors to choose from, effectively simulating the look of various materials such as wood grain and stone grain.

Common Applications:

- | | | |
